

# Homework Policy

At Seacliff Primary School we have a holistic approach to education and understand that learning takes place both at school and at home. Strong connections between school, families and the community allow students to engage in rich experiences that support authentic learning. We value the important role parents and caregivers play in working in partnership with the school to support their child's learning. We know that parents and caregivers provide this support in a wide variety of ways, including through helping their child with school-assigned homework.

Our teachers follow an evidence-based approach to the setting of homework. We value the need for students to have a balanced lifestyle, including having plenty of time for play, rest, family, recreation and cultural pursuits. We believe that homework should not intrude on family life or cause stress for students and their parents/caregivers.

## Homework and Achievement

Research into the impact of homework on student outcomes has been ongoing for many decades. It is a multifaceted area of study and the results of research into the effectiveness of homework are complex. Importantly, when considered across different stages of schooling, there is no statistical support for achievement benefits in the lower grades of primary school, and only very weak support for students in the upper grades of primary school (Hattie J. 2013). There is support for the achievement benefits of homework in the first years of high school but the benefit is moderately weak, while for senior high school students the achievement benefits of homework are moderately high (Horsley & Walker, 2013).

Research has established that students benefit from reading at home, on their own and with family members on a daily basis, (Department for Education 2014).

## Types of Homework

Homework may be necessary at times for students who have not completed set activities during school hours or for students who will benefit from further consolidation in an identified area. This is set at the discretion of the class teacher.

Sometimes, class teachers may choose to set a task that is directly related to an aspect of the day's learning. Some teachers may also set a task for the week to be time-managed by the student.

We understand that many students have after school commitments so if a student is unable to complete an overnight task, parents/caregivers are asked to communicate this to the teacher.

# Homework Expectations

## For Children in Reception and Year 1

Reading and practise of sight words at home. 10-20 minutes / night

## For Children in Years 2 to 5

Reading and / or set activities relating to the classroom program. Activities may involve investigation / research, literacy or numeracy. 15-20 minutes / night

## For Children in Years 6 to 7

Reading and / or set activities relating to the classroom program. Activities may involve investigation / research, literacy or numeracy. The total amount of homework for Year 6 and 7 students should not exceed two to three hours across the week.

If parents/caregivers wish to assign out of school learning tasks for their children in addition to those that teachers consider appropriate, (as detailed above), they can access a wide range of commercially available resources and programs such as activity books and online programs, (e.g. Study Ladder and Khan Academy). In this case, teachers are not responsible for monitoring or assessing these activities.

Children's education is most effective when teachers and parents/caregivers work in partnership. Our homework policy reflects this philosophy with a view to achieving the best outcomes for our students, in line with their current developmental needs.

If parents/caregivers choose to remove their child during school terms, e.g. family holidays, no homework will be set.
